

Introducing the PDS IVR

Event Recording Made Easy...

A Turn-key Solution to Capture, Archive
Search, and Record Events.

Video is a proven tool to better educate, train, connect and protect organizations everywhere. The PDS IVR is a proven analog video capture solution designed specifically to meet the unique challenges of recording a wide variety of events. This application empowers users to quickly and easily record and manage video events without extensive IT support headaches. Traditional security and surveillance video recording systems lack the feature set required to implement a successful event recording system making the ISR the perfect tool for capturing:

- Corporate Training Sessions
- Meeting Rooms
- Interview Rooms (Law Enforcement and HR)
- Safety and Compliance Procedures
- Special Events
- Correctional Facilities

Easy to use search engine:

We strive to be the industry leader in product consistency with all our PDS products. We strongly believe that a key ingredient to reducing your TCO (total cost of ownership) is providing solutions that empower users to perform their required tasks without extensive support from your IT Staff. We make your life easier by reducing the number of support issues allowing you to focus on mission critical activities.

Our Video Solutions Team can assist with:

- End to End System Design
- Custom Programming and Integration Services
- Hardware Configuration Services
- Complete System Implementation and Training
